The Seniors strongly believes that the proposed settlement offers a reasonable compromise that will enhance the ability of seniors and all Americans to access the internet and use innovative software products to make their computer experience easier and more enjoyable.

The settlement itself is tough on Microsoft, but is a fair outcome for all parties -- particularly senior consumers. Most important, this settlement will have a very positive impact on the American economy and will help pull us from the recession we have experienced over the past year.

Sincerely Forrest C. Milligan
